CHOICES RESIDENCE 9

CHOICES RESIDENCE 9

Residence 9 from Choices is a traditional timber look range of windows. Manufactured from low maintenance PVCu with a grained wood effect finish*.

Although aimed primarily at the heritage market, this window would not look out of place in any building due to its classic lines and beautiful finish.

A combination of classic styling and modern materials makes this window ideal for timber replacement in conservation areas.

*Eclectic Grey is a textured finish and not a wood effect.

SASH JOINTS

Residence 9 sashes can be manufactured with either welded corner joints or with the more traditional mechanically jointed corners.

WELDED SASHES

MECHANICAL SASHES

COLOUR RANGE

Residence 9 is available in a wide range of colour options that can be mixed in any inside/outside combination. Also in the range is a black foil (outer) and white grain (inner) profile that can also be used to match the effect of 'Tudor' style windows i.e. The outer frame of the window is made with the black/white foil and the sashes are manufactured with the white grain option for that traditional look.

DUAL COLOUR PROFILE

HANDLE CHOICES

A wide range of handle options is available to choose from starting from the standard cranked handle to the highly decorative Pear Drop and Monkey Tail designs.

The 'cranked' range offers a choice of 7 colours including: White, Black, Hardex Gold, Hardex Chrome, Hardex Satin, Hardex Bronze and an Antique 'hammered' Black. The Pear Drop is available in both Black and Pewter with matching operational or dummy retaining stays also available. The Monkey Tail handle is available in black with a matching retaining stay and there is also a version of the Monkey Tail available in an Antique Black finish (no matching stay).

CRANKED HANDLES

- 1 - WHITE
- 2 - BLACK
- 3 - HARDEX GOLD
- 4 - HARDEX CHROME
- 5 - HARDEX BRONZE
- 6 - HARDEX SATIN
- 7 - ANTIQUE BLACK

MONKEY TAIL ANTIQUE BLACK

MONKEY TAIL BLACK

PEAR DROP PEWTER PATINA

PEAR DROP BLACK

10" RETAINING STAYS

Available as a functional stay or as a dummy stay complete with a peg that holds the stay to the sash when the window is opened or closed. These are supplied loose for fitting on site

HINGE CHOICES

fig 5.3

fig 5.5

As well as the standard friction hinges used on Residence 9, there is also the option of upgrading to Easy Clean, Mega Trojan heavy duty and both functional and dummy* butt hinges.

FUNCTIONAL BUTT HINGES

Functional Butt Hinges (replaces friction stay), suitable for side hung sashes only. We recommend using the 'functional retaining stay' with this option.

DUMMY BUTT HINGES

Decorative dummy butt hinges are available. We would recommend using the Mega Trojan with this option, as it keeps the butt hinge close to the frame (see fig 5.3).

When dummy butt hinges are used with standard friction stays, there is a visible gap between the frame and dummy butt hinge when sash is in the open position (see fig 5.5).

CHOICES RESIDENCE 9 SINGLE AND DOUBLE DOORS

Residence 9 can be manufactured as single or double doors. They are supplied fully glazed with the glass bonded to the sash for both strength and security.

They are only available as open out and without a midrail.

The door sashes are hung on three butt hinges that are available in either black or white.

The Master leaf is fitted with lever/lever handles that operate a multipoint hook lock.

When double doors are specified, the slave leaf is fitted with a concealed single lever lock. This operates shootbolt locking top and bottom.

Residence 9 single or double doors

GASKET COLOUR & SPACER BAR

Inside Outside

GASKET COLOUR

As standard, all glazing gaskets are black with the exception of single colour white grain foil, with this option the inner sash seal and glazing gaskets will be supplied in white and the outer sash seal supplied in black.

SPACER BAR

As standard, Residence 9 is supplied with black spacer bar with the exception of products manufactured in single colour white grain foil which has the white spacer bar as standard.
